

About the Author

Dr. Thomas Salem Moore is an American writer, researcher, and political philosopher whose work centers on democratic renewal, civic equilibrium, and the defense of constitutional liberty. With more than a decade of professional experience in marketing, systems analysis, and behavioral communication, he brings a unique lens to the structures of power that shape nations—how they rise, how they decay, and how they can be repaired.

Raised with a deep respect for the founding ideals of the United States, Moore became increasingly concerned with the widening gap between those ideals and the modern political reality. Over years of independent study, he explored political theory, history, psychology, economics, and systems design—ultimately synthesizing these fields into a new civic framework he calls **Libraism**, a philosophy rooted in balance, responsibility, and cooperative governance rather than domination or division.

Moore is known for his ability to dissect political narratives, expose structural incentives, and communicate complex ideas in clear, accessible language. His work draws inspiration from the world's most influential thinkers and defenders of liberty—from Jefferson, Madison, and Paine, to Orwell, Arendt, Frederick Douglass, and Socrates. Like them, he writes not for partisan gain but to illuminate the mechanisms of freedom—and the dangers that threaten it.

Libraism: The Philosophy of Democratic Equilibrium is the culmination of years of reflection and analysis, written during a time when division, misinformation, and institutional decay cloud the national consciousness. The book offers not merely criticism, but a path forward: a model of governance that rebalances power, strengthens civic virtue, and restores the principles that once made republics thrive.

Moore believes that the future of liberty depends on citizens willing to think boldly, question deeply, and challenge systems that no longer serve the people they were built to protect. His work is dedicated to that effort—and to all who refuse to surrender the idea that a free, balanced, and principled society is still possible.
